🧠 Skills

- JavaScript (ES6)
- Node.Js
- Express
- React
- jQuery
- MySql
- MongoDB
- Git + Github

📂 Projects

09/2020 – present

Tinder Movies, *https://github.com/austinbarton1997/Tinder-Movies*
Tinder Movies lets you and your partner discover movies you both would like to watch. Displayed on the dashboard is a movie you can like or dislike. From there you are able to view movies that you and your partner both like.

Notes, *https://github.com/austinbarton1997/Notes*
Notes app was designed to be similar to Apple Notes. Keep track of daily events or just anything you need to get done.

Personal Site, *http://austinbarton.dev/*
My Personal Site is built using react. I use Netlify to host my react projects and switch my google domain dns settings to point my domain towards the Netlify build.

Newsletter Signup, *https://github.com/austinbarton1997/newsletter-signup*
This Newsletter signup uses MailChimp api to register users to my newsletter. I am hosting the site on Herokuapp.com.
